

Estatraw per bin, with ratio panels — data_4pi_phisfold_bin10deg
 4π (accut off), own 20614 bins · main and ratio y-axes identical across all three figures
 All three coincide here too. Own binning, so these bins correspond to no other run.

— E^{raw} (row norm, production) — E^{diag} (least squares) — E^{prop} (PR-10-006 App. II)
